

# DARCO Medical India Pvt. Ltd.

## Your partner for foot care celebrates its 5th anniversary

For over 30 years DARCO has been putting orthopaedic quality on the feet. Today, we have reason to celebrate; 5 years ago we opened our India operations – and we're here to stay!

August 15th is a great day of celebration for the people of India. Over 70 years ago, India's National Day of Independence was commemorated. We're very proud to have our celebration coincide with this national day of recognition.

August 15, 2012 DARCO Medical India Pvt. Ltd. was born. In the center of Dharwad, Karnataka, we opened our doors on the new facility and we are proud to say that over the past 5 years we've made some amazing steps in the effort to improve the quality of life for many in the country. DARCO India has built a distribution network and we continue to seek expansion in territories not yet serviced. One of our greatest accomplishments has been the close cooperation with national societies and professionals in the country. Some of our closest work has been done with the Diabetic Foot Society of India (DFSI) and the Indian Foot and Ankle Society (IFAS).

From the beginning, DARCO India has been driven by a vision to contribute to communities while initiating change among the country's leaders. We work to have our voice heard among medical professionals and physicians who care for the people of India. And shifting that paradigm within the machinery of the health care system is slowly taking hold. In the span of 5 years, DARCO India has forged relationships built on trust and a mutual desire to

improve foot care in India and to elevate awareness among the people. We propagate valuable information and provide expertise building workshops through the seminars and congresses we attend as well as integrating value-based services where we can in the country. Our E-News reaches many in the digital world and every individual can benefit from our 30 years of experience and we've made our resources available to the „mobile friendly user“, as well. Finally, one of our greatest accomplishments is our sponsorship creating the „Friday Academicals“, a hard-back book published in conjunction with the Indian Foot and Ankle Society (IFAS). We take pride in every task and have a solid reputation to show for it. We're proud of the progress we've made and credit much of our growth to the valuable teamwork done with our local partners.

**DARCO has made a commitment to improve the quality of life for those individuals in need and contribute to the health of a nation. We're here to stay!**
